PROFILE

Entry-level Python Full-Stack Developer with hands-on experience building scalable web applications using Django, REST APIs, SQL, and modern frontend technologies. Skilled in backend development, database design, API integration, debugging, and version control. Built real-world projects including a role-based turf booking platform and an e-commerce system. Eager to contribute to software development teams while growing as a full-stack engineer.

SKILLS

Programming Languages: Python, JavaScript, SQL

Backend: Django, Django REST Framework (DRF), REST APIs, ORM, Authentication

Frontend: HTML, CSS, Bootstrap, React

Databases: PostgreSQL, MySQL, SQLite

Tools: Git, GitHub, Postman, VS Code

Soft Skills: Problem Solving, Debugging, Communication, Team Collaboration, Adaptability, Time Management

EXPERIENCE

Python Full-Stack Developer Trainee

Luminar Technolab

Aug 2025 – Apr 2026

Kerala, India

- Completed hands-on training in Django and REST APIs.
- Built and debugged web applications with authentication and CRUD operations.
- Used SQL queries for data validation and issue troubleshooting.
- Tested APIs using Postman and resolved backend issues.
- Participated in debugging, testing, and software development lifecycle activities.
- Applied Git and GitHub for version control and collaborative development.

PROJECTS

TurfHub | Django, Bootstrap

Feb 2026 – Present

- Developed a role-based turf booking platform supporting Admin, Owner, and User modules.
- Implemented booking validation logic to prevent overlapping reservations.
- Developed review and rating functionality for user feedback and turf evaluation.
- Implemented search and filtering features based on location and sport category.
- Implemented authentication and role-based access control using Django authentication system.
- Source Code: github.com/Mable987/TurfHub

PhoneNext | Django, Bootstrap | Live Demo

Feb 2026

- Developed backend logic for an e-commerce platform including authentication, cart management, and order workflows.
- Designed database models and implemented dynamic product search using ORM.
- Developed REST APIs for product listing and cart operations.
- Implemented user authentication, session management, and secure access control.
- Source Code: github.com/Mable987/PhoneNext

EDUCATION

B.E. Computer Science and Engineering

Good Shepherd College of Engineering and Technology

2021 – 2025

Tamil Nadu

COURSES AND CERTIFICATIONS

Machine Learning Internship — iStudio

Aug 2024

Completed hands-on training in supervised learning, data preprocessing, and model evaluation using Python.
